

513.00 JUVENILE OPERATIONS

- Although all components of the department are required to support juvenile operations to facilitate specialization, this function will be centered in the Investigations Section, General Assignment Unit and the Gang Intervention Unit, which will concentrate on the control of delinquent activity; and the NAT Unit which will concentrate on programs directed at the prevention of delinquency.
- The NAT Unit will be responsible for designing and implementing programs intended to prevent and control delinquent and criminal behavior by youthful offenders.
- Annually, all youth enforcement and prevention programs will be formally evaluated for efficiency by an Investigations Sergeant. The annual report will be forwarded to the Chief of Police for review.
